Power BI: Part 1 - Getting Started: Assignment-3

Objective-Combination Visualizations for Correlated Value Columns

Use Case -Design dashboard to make use of Power BI DAX formulas and perform calculations

Source - Shipping Categories and Shippers (Open Data - Northwind OData) and Lans Transport Corp.

Analytics- Create Bucketed Categories to represent value measures on categories axis. Use scatter plot to identify outliers or outperformers.

Dashboard - Delivery Analysis

1. Trips by Shipping Days Binned by Trip Type (Create Table)
2. Delivery Days Vs Due Days
3. Delivery Days Vs Due Days by Destination City
4. KPIs for Cost Per Miles, Revenue Per Miles, On Time Deliveries, Avg. Miles Per Trip (Set Context)
